

# NEXTAURA\_ENV.md

**Paste this at the start of any Claude dev session.**

**Keep it updated. The more accurate this is, the less broken code you get.**

---

## SYSTEM

- **Host OS:** Windows 11
- **WSL Version:** WSL 2
- **WSL Distro:** Ubuntu 24.04
- **WSL IP (Ollama endpoint):** 172.30.80.1:11434
- **Windows username:**
- **WSL username:** archi

## HARDWARE

- **CPU:** Ryzen 9 7950X
- **GPU:** RTX 5090
- **RAM:** 128GB
- **CUDA Version:**
- **GPU Driver Version:**

## LANGUAGE RUNTIMES

- **Rust:** `rustc --version` →
- **Node:** `node --version` →

- **Python:** `python3 --version` →
- **Cargo:** `cargo --version` →

## FRAMEWORKS & TOOLS

- **Tauri Version:**
- **React / Vite:**
- **Ollama Version:** `ollama --version` →
- **Ollama Models Pulled:** `ollama list` →
  - (e.g. qwen2.5-coder:7b, llama3:70b)
- **GitHub Handle:** 1archit3ct1
- **Git default branch:** main

## KEY PATHS (WSL)

- **Repo root:**
- **CEO Agent app:**
- **Orchestrator / agent loop:**
- **task\_status.json:**
- **AGENTS.md:**
- **Ollama scripts dir:**

## KEY PATHS (Windows)

- **Repo root (Windows side):**

## ACTIVE BLOCKERS

- `nemoclaw` not found in WSL PATH
- (add others)

## KNOWN WORKING

- Ollama endpoint reachable at 172.30.80.1:11434
- CEO Agent loop executing (Tauri + React)
- audit\_failure\_router.py running
- task queue live
- GitHub repos: nextaura-ceo-agent, (list others)

## CLOUD CREDITS (time-sensitive)

- **DashScope / Alibaba:** 90-day window — PRIORITY
- **IBM Cloud:** Code Engine deployed (Qvrm)
- **AWS:**
- **Azure:**

## CURRENT PROJECT FOCUS

<!-- One sentence. What are you about to ask Claude to build or fix? -->

## ARCHITECTURE NOTES

- Agent orchestration: flat-file state machine (task\_status.json as ground truth)
- Repo-wide write mutex pattern
- LLM = stateless worker, not self-orchestrating manager
- Spawn-point pattern via AGENTS.md
- CEO app: Tauri + React, live agent loop, Ollama-backed coding model
- Qvrm: agent trust protocol, deployed via IBM Cloud Code Engine
- AURA: AI-native video editor (moment graph, intent-driven)

## WHAT CLAUDE SHOULD NEVER DO IN THIS REPO

- No stubs or placeholders — complete implementations only
- No assumptions about file paths — always confirm first

- No generating code that touches task\_status.json schema without showing the diff
  - No modifying AGENTS.md without explicit instruction
- 

**TO UPDATE: run these and paste output into the fields above**

**rustc --version**

**node --version**

**python3 --version**

**cargo --version**

**ollama --version**

**ollama list**

**cat /etc/os-release | grep VERSION**
